

Credit Card Processing Savings Analysis

Helping you save thousands in monthly processing fees.

- **Why** do I need it?

Did you know that 9 out of 10 businesses are overpaying in credit card processing fees? And many providers increase their rates over time, so before you know it, you are overpaying in fees each month.

We've partnered with specialists who can save businesses 15-30% on these fees and guarantee that rates will never go up. No matter what industry your business is in, whether considered high risk or not, we can help you lower and stabilize fees.

- **What** is it?

In order to continue to help your business risk less and save more, we offer a free, no-obligation savings analysis for your credit card processing. All we need for this review is 2-3 months of processing statements and 30 minutes of your time to analyze how you have everything set up. Through this review, we can give you an overview of how we can optimize hard and soft processing costs and let you know how we can save you money. If you choose to move forward, we have 30, 60, and 90-day reviews to make sure we are saving you money as proposed.

- **What** does it cost?

This review is free for members. Depending on the results of the review and recommended go-forward processes, there may be some additional services, which will always be offered at a member discounted price.

- **Where** do I start?

Log into your member portal and visit our store to request a credit card processing review or contact your agent.
